

BMW Cas 4 Unlocker for 5m48h,1n35h by Enigmatool UK.

This Cas4 unlocker will safely allow you to unlock the secured MC9S12XEP100 processor. Also know as a MC9S12XEP100 programmer.

Compatible with the following vehicles:

- BMW 5 Series F Chasis
- BMW 6 Series F Chasis
- BMW 7 Series F Chasis
- Rolls Royce Phantom II
- Rollys Royce Wraith
- Rollys Royce Ghost

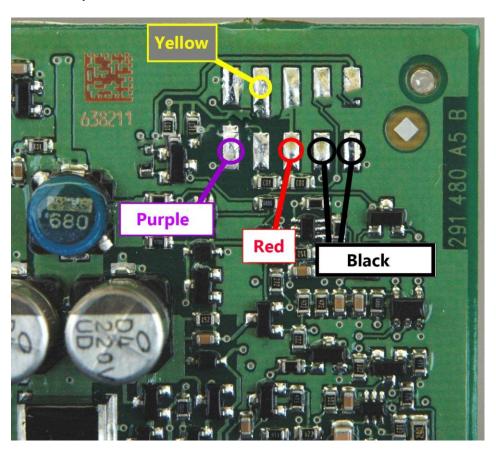

There is no need to lift any pins or heat the CPU !!!!! Unlocks within minutes and safe to use.

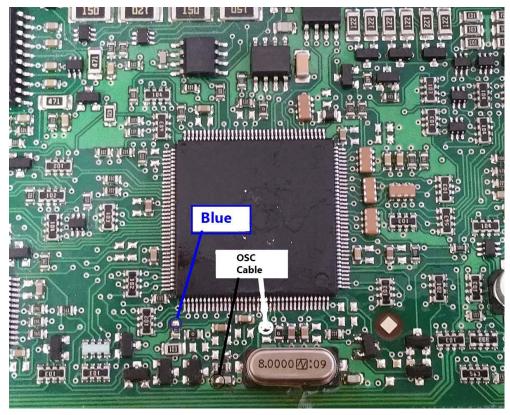

Make sure you use a good USB power supply, Samsung Galaxy S6 or similar is recommended.

First connect as in diagram below, do not extend the wires. Make sure that you double check the wiring.

## **Connection points**

## Usage

- 1. Check wiring, connect D connector to the CAS4 unlocker
- 2. Power on device using cable connected to USB charger.
- 3. Identify mask on processor, e,g 5M48H, 1N35H
- 4. Goto BMW, select CAS4, then select the processor, e.g 5M48H
- 5. Now select BACKUP, the unlocker will say wait on the screen and you will see a progress bar, BE PATIENT THIS CAN TAKE A FEW MINUTES.
- 6. Once completed, this backup procedure will have backed up the essential files, these will be stored on the sdcard and can be accessed if need to restore backup or to make changes to data (key programming etc)
- 7. Goto unlock, please wait as this will now unlock the secured processor.
- 8. Lastly go KM and it will show old km, simply zero it or enter desired value.

Note: Once the cpu is unlocked, it will not need unlocking if you have to do the cas4 again. It is also a good idea to backup the D flash and P flash which is saved to the sdcard when you select backup.
